Connecting the Water-Resistant Case to a Pedestal

⚠️ Caution: A set screw has been provided to be installed into the back side of the water resistant case to secure it to the handlebar pedestal. Ensure that the screw is properly installed to prevent the case from falling from the pedestal.

Step 1. Connect the dual T-slots (A) on case to the dual T-tabs (B) on any Arkon dual-T pedestal head (sold separately). Insert the set screw (C) into the set screw hole (D) and screw in tightly to prevent the case from slipping off the pedestal head.

*Not a complete solution by itself. See www.arkon.com for compatible dual T-tab pedestals.

*Set screw ensures secure connection to dual-T mount.
